corpse (kɔ:ps, kɔ:s), *sb.* Formerly 4–8 corps; also 6–7 corpes, *Sc.* corpis. [ME. *corps*, orig. merely a variant spelling of the earlier ME. *cors* (see CORSE), a. OF. (11–14th c.) *cors* = Pr. *cors*:—L. *corpus* body. In the 14th c. the spelling of OF. *cors* was perverted after L. to *corps*, and this fashion came also into Eng., where *corps* is found side by side with *cors*, and became gradually (by 1500) the prevalent, and at length the ordinary form, while at the same time *cors*, from 16th c. spelt CORSE (q.v.), has never become obsolete. In Fr. the *p* is a mere bad spelling, which has never affected the pronunciation. In Eng. also, at first, the *p* was mute, *corps* being only a fancy spelling of *cors*; but app. by the end of the 15th c. (in some parts of the country, or with some speakers) the *p* began to be pronounced, and this became at length the ordinary practice; though even at the present day some who write *corpse* pronounce *corse*, at least in reading. The spelling with final *e*, *corpse* (perhaps taken from the modern pl. *corpses*) was only a rare and casual variation before the 19th c., in which it has become the accepted form in the surviving sense **2**, which is thus differentiated from CORPS, used with French pronunciation in the military sense. In Fr. *cors*, *corps* the pl. is the same as the sing.; in Eng. also the ordinary plural down to 1750 was *corps*, though *corpses* is occasional from 16th c. In the 17th c. *corps* meaning a single dead body was often construed as a plural = 'remains', as is still the case dialectally; in Sc., *corps* pl. gave rise to a truncated singular *corp* before 1500.

Comparing the history of F. *cors*, *corps*, and that of Eng. *cors*, *corps*, *corpse*, we see that while modF. (kɔr) has in pronunciation lost the final *s*, Eng. has not only retained it, but pronounces the *p*, and adds a final *e* mute, which is neither etymological nor phonetic, but serves to distinguish the word from the special sense spelt *corps* and pronounced (kɔə(r)).]

corpuscle ('kɔ:pəs(ə)l, kɔ:'pʌs(ə)l). [mod. ad. L. *corpuscul-um,* dim. of L. *corpus* body.]

1. a. A minute body or particle of matter. Sometimes identified with *atom* or with *molecule.*

1660 BOYLE *New Exp. Phys. Mech.* i. 25 Each Corpuscle endeavours to beat off all others. **1674** PETTY *Disc. Dupl. Proportion* 124 Corpuscles, or the smallest Bodies that can

possibly be seen.. these Corpuscles are made of Atoms, or the smallest bodies in Nature. **1697** POTTER *Antiq. Greece* IV. viii. (1715) 241 For from their Bodies on the Pile do fly Enrag'd Corpuscles justling in the Sky. **1725** WATTS *Logic* I. iii. §4 Who knows what are the figures of the little corpuscles that compose and distinguish different bodies? **1812** SIR H. DAVY *Chem. Philos.* 56 Whether matter consists of indivisible corpuscles, or physical points.

†**b.** Little body (of an animal). *Obs.*

1665 HOOKE *Microgr.* 197 This pretty little grey Moth.. could very nimbly, and as it seem'd very easily move its corpuscle, through the Air, from place to place.

2. *Phys.* **a.** Any minute body (usually of microscopic size), forming a more or less distinct part of the organism.

Often with defining attributes, or specific additions (chiefly in plural), as *blood-corpuscles* (see also b), *lymph*-c.; *gustatory* or *taste, tactile* or *touch* c. *Malpighian corpuscles*: certain minute bodies in the substance of the spleen (*splenic* c.), and of the kidney. *Pacinian* c., c. *of Vater*: minute bulbous bodies enclosing the ends of nerves in various parts of the body, esp. in the fingers and toes.

b. *esp.* (*pl.*) Minute rounded or discoidal bodies, constituting a large part of the blood in man and other vertebrates.

1845–6 G. E. DAY tr. *Simon's Anim. Chem.* I. 106 On shaking the blood with oxygen gas. the corpuscles became brighter and more transparent. **1869** HUXLEY *Phys.* (ed. 3) iii. 65 The particles, or corpuscles, of the blood.. called respectively the red corpuscles and the colourless corpuscles.

c. *Electr.* J. J. Thomson's name for what was subsequently called an ELECTRON[2].

1897 J. J. THOMSON in *Phil. Mag.* 5th Ser. XLIV. 311 These primordial atoms, which we shall for brevity call corpuscles. **1902** *Encycl. Brit.* XXX. 452/2 These particles, which were termed by their discoverer *corpuscles*, are more commonly spoken of as *electrons*, the particle thus being identified with the charge which it carries. **1958** GLASSTONE *Sourcebk. Atomic Energy* (ed. 2) ii. 38 The name electron, originally intended by Stoney.. for the magnitude of the charge, soon became associated with the actual particles themselves. Possibly in the interest of strict accuracy, Thomson adhered to the term corpuscle for about twenty years, but ultimately he gave it up in favor of electron.

corral (kɒ'ræl, -'rɑːl), *v.* Chiefly *U.S.* [f. prec. sb.]

1. a. *trans.* To form (wagons) into a corral.

1848 E. BRYANT *California* (1849) iii. 19 The wagons, in forming the encampment, were what is called *corraled*, an anglicised Spanish word, the significance of which, in our use of the term, is, that they were formed in a circle. **1868** DILKE *Greater Brit.* I. i. xiii. 143 As many wagons as there were fires were corralled in an ellipse about the road.

b. *absol.* To draw up the wagons in a circle.

*a***1848** RUXTON *Life Far West* (1849) 12 It was pretty nigh upon sundown, and Bill had just sung out to 'corral'. **1875** *Fur, Fin & Feather* 108 At midnight the rear drivers joyously see the little fires flashing up far ahead here and there upon the prairie, telling them that the head of the train has begun to corral. **1894** in *Kansas Hist. Coll.* (1896) V. 93 Several trains were compelled to corral and 'stand them [*sc.* Indians] off' until relieved by the dragoons.

2. To shut up in, or as in, a corral; to confine.

1847 RUXTON *Adv. Mexico* 238 (Bartlett) The animals were all collected and coralled. **1890** E. N. BUXTON in *19th Cent.* No. 162. 224 At night.. they coral their flocks of goats. **1890** *Century Mag.* Aug. 613/1 Here they coralled us [prisoners] to the number of seven or eight thousand.

3. *U.S. colloq.* or *slang.* To secure, lay hold of, seize, capture, 'collar'.

1860 *Knickerbocker* Jan. 100, I want to 'corel' you for a little chat. **1867** 'MARK TWAIN' *Jumping Frog* 157 That sort of thing would corral their sympathies. **1868** *Amer. Newspaper* in Dilke *Greater Brit.* I. 160 'These leeches corral more clear cash than most quartz mills', remonstrates the editor. **1885** *Harper's Mag.* Apr. 663/2 We dashed out of the door, corralled a porter. **1888** *New York Times* 30 Dec., We will corral some of the ice cream. **1910** WODEHOUSE *Psmith in City* viii. 64 How did we corral him, and become to him practically as long-lost sons? **1965** *Economist* 23 Jan. 322/1 The whip is charged theoretically with the duty of corraling votes for party programmes.

Hence **corralled** *ppl. a.*

correlate ('kɒrɪleɪt), *sb.* [f. COR- + L. *relātum* (a thing) referred, related: see next. Probably suggested by the earlier *correlation* and *correlative*; but there may have been a mod.L. **correlātum*, in philosophical use.]

1. Each of two things so related that the one necessarily implies or is complementary to the other.

1643 HERLE *Answ. Ferne* 27 Soveraignty 'tis a relative, and cannot subsist without its correlat subjection. 1722 WOLLASTON *Relig. Nat.* iii. 43 The existence.. of one correlate [infers directly] that of the other. 1842-3 GROVE *Corr. Phys. Forces* (ed. 6) 165 The idea of height cannot exist without involving the idea of its correlate, depth. 1880 HUXLEY *Crayfish* iii. 127 The death of a body, as a whole, is the necessary correlate of its life.

2. More generally: Each of two related things; either of the terms of a relation, viewed in reference to the other.

1644-7 CLEVELAND *Char. Lond. Diurn.* 4 That so wounding and healing, like loving Correlates, might both worke. 1660 STILLINGFLEET *Iren.* II. iv. (1662) 196 If they were [church-officers] they could have no other Correlate, but the whole body of the Church of God. 1733 BERKELEY *Th. Vision* §39 In certain cases a sign may suggest its correlate as an image, in others as an effect, in others as a cause. *a* 1878 LEWES *Stud. Psychol.* (1879) 14 We can classify subjective facts while remaining ignorant of their objective correlates.

3. Something corresponding or analogous; an analogue. *rare.*

1821 DE QUINCEY *Richter* Wks. XIV. 115 The wildest vanity could not pretend to show the correlate of Paradise Lost [in French literature].

4. *Gram.* = CORRELATIVE B. 3.

1829 JAS. MILL *Hum. Mind* (1869) I. ix. 313 The term *tantus* which is its correlate [i.e. that of *quantus*].

5. *Physics*, etc. = CORRELATIVE B. 4, 5.

1855 H. SPENCER *Princ. Psychol.* (1872) I. II. iii. 204 A like amount of sensation is the correlate of an increased amount of produced motion. 1862 —— *First Princ.* II. viii. §71 The forces called vital, which we have seen to be correlates of the forces called physical. 1867 C. BRAY (*title*) On Force and its Mental Correlates.

correlate ('kɒrɪleɪt), *a. rare.* [f. COR- + L. *relāt-us*, pa. pple. of *referre* to bring back, refer: see

prec.] Mutually related; correlated; involving correlation.

1842 GROVE *Corr. Phys. Forces* 52 The correlate character of the two forces, electricity and heat. 1877 FARRAR *Days of Youth* iv. 33 Consider..some of our duties and some of our dangers—for the two are correlate—in the use of speech.

correlate (kɒrɪ'leɪt), *v.* [f. COR- + RELATE: see CORRELATE *sb.*]

1. a. *intr.* To have a mutual relation; to stand in correlation, be correlative (*with* or *to* another).

a 1742 FIELDING *J. Andrews* Pref., What Caricature is in painting, Burlesque is in writing; and, in the same manner the comic writer and painter correlate to each other. 1865 GROTE *Plato* I. xii. 421 The real alone is knowable, correlating with knowledge. *a* 1871 —— *Eth. Fragm.* iv. (1876) 91 Ethical obligation correlates and is indissolubly conjoined with ethical right.

b. *trans.* To be correlative to. *rare.*

1879 W. E. HEARN *Aryan Househ.* v. §3. 122 The right to the property correlated the duty to the *Sacra.*

2. To place in or bring into correlation; to establish or indicate the proper relation between.

1849 MURCHISON *Siluria* vii. 134 Mr. Symonds was.. enabled to correlate these beds with their equivalents near Ludlow. 1881 J. GEIKIE in *Nature* 337 He correlates the interglacial beds of Mont Perrier with those of Dürnten. 1925 N. BOHR *Theory of Spectra* (ed. 2) 135 It has been possible to correlate each term with the occurrence of electron orbits of a given type. 1930 *Economist* 18 Oct. 715/2 To prove by an historical statistical analysis that..it is impossible to correlate from available evidence either high rates and low stock prices or low rates and high stock prices with any certainty. 1952 G. H. BOURNE *Cytol. & Cell Physiol.* (ed. 2) vi. 273 Bennett was not able to correlate changes in the Golgi material with secretion in the cat adrenal. 1971 *Nature* 15 Jan. 182/1 So the observed luminosity of the primary [star] can be correlated reliably with its original main-sequence mass. 1971 *Daily Tel.* 12 Feb. 8/2 Are you wondering how many people spend their time..in devising such idiot statistical measures, applying them, collating and correlating them?

3. *pass.* To have correlation, to be intimately or regularly connected or related (*with*, rarely *to*); *spec.* in *Biol.* of structures or characteristics in animals and plants (cf. CORRELATION 3).

1862 F. HALL *Hindu Philos. Syst.* 95 Transmuting relations into entities, and interposing these entities between things correlated. 1870 ROLLESTON *Anim. Life* Introd. 20 Parasitism..is often found to be correlated with ..disappearance of structures. 1875 POSTE *Gaius* II. Comm. (ed. 2) 160 Other rights..have no determinate subject..to which they are correlated.

correlated ('kɒrɪleɪtɪd), *ppl. a.* [f. prec. + -ED¹.] Mutually or intimately related; involving correlation: *spec.* in *Biol.* (cf. CORRELATION 3).

1859 DARWIN *Orig. Spec.* iv. 86 A large part of their structure is merely the correlated result of successive changes in the structure of their larvæ. 1865 —— in *Life & Lett.* (1887) III. 33 A modification in one part will cause correlated changes in other parts. 1878 FISKE in *N. Amer. Rev.* CXXVI. 36 The dynamic circuit of correlated physical motions.

correlation (kɒrɪ'leɪʃən). [f. COR- + RELATION: cf. F. *corrélation*, and see CORRELATIVE.]

1. a. The condition of being correlated; mutual relation of two or more things (implying intimate or necessary connexion).

1561 T. NORTON *Calvin's Inst.* iv. xvii. §14 If he did set before vs only an empty imaginatiue forme of bred..where were y^e correlation or similitude [*analogia aut similitudo*] which should leade vs from the visible thing to the inuisible. 1658 SIR T. BROWNE *Gard. Cyrus* iii, How in animall natures, even colours hold correspondencies, and mutuall correlations. 1849 MURCHISON *Siluria* viii. 148 The rocks of Cumberland will be placed in precise correlation with the types of Shropshire and Wales. 1864 BOWEN *Logic* iii. 51 The mutual dependence and correlation of these three Axioms.

†**b.** Relationship (of persons). *Obs.*

1649 JER. TAYLOR *Gt. Exemp.* Ad sect. 10 ¶9 Christian charity is a higher thing than to be confined within the terms of dependence and correlation. 1652 SPARKE *Prim. Devot.* (1663) 89 Christ..made choise of brethren, as..Simon.. and Andrew..hereby..providing against schisme..both by corporall and spirituall correlation.

c. In *Statistics*, an interdependence of two or more variable quantities such that a change in the value of one is associated with a change in the value or the expectation of the others; also, the value of this as represented by a correlation coefficient. So *correlation coefficient* or *coefficient of correlation*: a number between −1 and 1 calculated so as to represent the linear interdependence of two variables or two sets of data; *spec.* the product-moment coefficient (see PRODUCT *sb.*¹).

1888 F. GALTON in *Proc. R. Soc.* XLV. 143 The statures of kinsmen are co-related variables; thus, the stature of the father is correlated to that of the adult son,..and so on; but the index of co-relation..is different in the different cases. 1896 K. PEARSON in *Ibid.* LIX. 302 Let r_0 be the coefficient of correlation between parent and offspring. *Ibid.* 303 We conclude that there is a sensible correlation (*circa* 0·18) between fertility and height in the mothers of daughters. 1909 W. & E. ELDERTON *Primer Statistics* 57 In such cases there is no relationship, therefore, between length and breadth, and we say that the 'coefficient of correlation' is zero. 1933 *Forestry* VII. 27 It may be stated that a correlation coefficient is a number expressing the degree of correlation between two variates, as, for example, weight and volume, or specific gravity and strength. A correlation coefficient of +1 indicates a direct linear relation, a coefficient of −1 indicates an inverse linear relation, while one of 0·0 indicates absence of relations between the variates. 1943 N. BALCHIN *Small Back Room* i. 8 There's a positive correlation between penetration and the height of the man firing. 1960 F. LAND *Lang. Maths.* xiv. 247 We need to be able to describe this gradation from perfect correlation to no correlation at all, and for this purpose we can calculate a 'correlation coefficient'. 1964 R. VON MISES *Math. Theory Probability & Statistics* xi. 572 Out of 239 patients treated with serum, 9 patients died, and out of 244 left without serum, 29 died. Compute the correlation coefficient between treatment and recovery. 1969 *Computers & Humanities* III. 145 After correlation coefficients are computed for every pair of variables, they are entered in a correlation matrix which summarizes the degree of similarity between pairs of variables.

2. *correlation of forces* (in *Physics*): a phrase introduced by Grove to express the mutual relation that exists between the various forms of force or energy, by virtue of which any one form is convertible into an equivalent amount of any other. (Cf. *conservation of energy*, s.v. CONSERVATION 4.)

1843 GROVE *Correlation of Physical Forces* 95 The sense I have attached to the word correlation..[is] a reciprocal production; in other words, that any force capable of producing another, may in its turn be produced by it. 1869 MRS. SOMERVILLE *Molec. Sc.* I. ii. 33 Another proof of the correlation of heat and electricity.

3. *Biol.* Mutual relation of association between different structures, characteristics, etc. in an animal or plant; 'the normal coincidence of one phenomenon, character, etc., with another' (Darwin *Orig. Species*, Gloss.).

1859 DARWIN *Orig. Spec.* Introd. i. 9 The complex..laws of variation and of correlation of growth..Some instances of correlation are quite whimsical: thus cats which are entirely white and have blue eyes are invariably [ed. 1878 generally] deaf. 1870 ROLLESTON *Anim. Life* 105 The correlation of large size of ova with the completion of development before hatching. 1883 *19th Cent.* May 763 There is..a mysterious law of correlation of growth between the hair and the teeth.

4. *Geom.* The reciprocal relation between propositions, figures, etc. derivable from each other by interchanging the words *point* and *plane*, or *point* and *line*: cf. CORRELATIVE *a.* 6.

5. The action of correlating or bringing into mutual relation.

1879 GEO. ELIOT *Theo. Such* xi, It is on such false correlations that men found half their inferences about each other. 1886 A. J. JUKES-BROWNE *Student's Handbk. Hist. Geol.* iv. iii. 27 The correlation and classification of rocks on Palæontological principles. 1963 *Gloss. Mining Terms* (*B.S.I.*) i. 6 *Correlation*, the process of orientating underground survey lines or of coordinating underground survey stations to the National Grid.

corre'lational, *a.* [f. CORRELATION + -AL¹.] Of or pertaining to correlation (esp. sense 1 c); employing correlation.

1952 C. P. BLACKER *Eugenics* 39 The correlational calculus, the *fons et origo* of that far-reaching ramification —the modern mathematical theory of statistics. 1970 *Computers & Humanities* IV. 350 Correlational analysis of relations between scales over time and between scales and other variables.

correlative (kə'rɛlətɪv), *a.* and *sb.* [cf. F. *correlatif*, *-ive* (16th c.); perh. the source of both was a mod.L. **correlātīvus*, f. *cor-* = *com-* together + *relātīvus* RELATIVE, referring.]

A. *adj.*

1. Having a reciprocal relation such that each necessarily implies, or is complementary to, the other; mutually interdependent; involving such a relation. Const. *with*, rarely *to*.

1690 LOCKE *Hum. Und.* II. xxv. §2 Father and son, husband and wife, and such other correlative terms. 1768-74 TUCKER *Lt. Nat.* (1852) II. 305 Neighbourhood.. is correlative, so that no man can be neighbour to another without the other being likewise neighbour to him. 1853 GROTE *Greece* II. lxxxiv. XI. 80 A free community with correlative rights and duties belonging to every citizen.

2. Normally or naturally related to each other or occurring in conjunction.

1530 RASTELL *Bk. Purgat.* III. xiii, The iustyce of God and the mercye of God be evermore correlatyve and concurrant. 1563 FOXE *A. & M.*, This conclusion is correlatiue with the first Article of our faith. 1859 GEO. ELIOT *A. Bede* xix, It was Adam's strength, not its correlative hardness, that influenced his meditations.

b. Related in the way of analogy, similarity, etc.; corresponding, analogous.

1596 BACON *Max. Law* Reg. xxv, Another sort of *ambiguitas latens* is correlative unto this: for this ambiguity ..is, when one name and appellation doth denominate divers things: and the second is when the same thing is called by divers names. 1829 I. TAYLOR *Enthus.* ii. (1867) 26 Such utterances of desire, or hope, or love, as seem to suppose the existence of correlative feelings..in Him to whom they are addressed. 1872 W. S. SYMONDS *Rec. 3. *Gram.* Applied to words corresponding to each other, and regularly used together, each in one member of a compound or complex sentence: e.g. *either—or*; *so—as*.

1871 *Public Sch. Lat. Gram.* §94 (*margin*) Correlative Construction. 1879 ROBY *Lat. Gram.* §1635 Comparative sentences..are introduced by correlative adjectives or adverbs; e.g. *tantus...quantus, tam...quam, sic...ut.*

4. *Physics.* Of forces: Mutually dependent and convertible: see CORRELATION 2.

1843 GROVE *Corr. Phys. Forces* 96 The forces are inseparable and mutually dependent,—correlative, but not identical. 1862 HUXLEY *Lect. Wrkg. Men* 27 The forces of that [living] matter are..correlative with and convertible into those of inorganic nature.

5. *Biol.* Of variations of structure, etc.: Mutually related so that the one is normally associated with the other: see CORRELATION 3.

1876 FOSTER *Phys.* II. ii. (1879) 309 The blood.. undergoes important correlative changes.

6. *Geom.* Said of propositions, figures, etc. reciprocally related so that to a *point* in either corresponds (in solid geometry) a *plane*, or (in plane geometry) a *straight line* in the other.

1881 C. TAYLOR *Geom. Conics* 346 Figures which correspond according to the law of duality have been called by Chasles..correlative figures. 1885 LEUDESDORF *Cremona's Proj. Geom.* 27 The following problem admits of two correlative solutions. *Ibid.* 28 In the Geometry of the plane, two correlative propositions are deduced one from the other by inter-changing the words *point* and *line*.

B. *sb.*

1. Each of two things having a reciprocal relation such that the one necessarily implies, or is complementary to, the other.

1545 JOYE *Exp. Dan.* iii. 36 The signe & the thing signified be correlatyues. 1563-87 FOXE *A. & M.* (1596) 12/2 Where no inferior is, there can be no superior, for..these togither are correlatiues. 1602 T. FITZHERBERT *Apol.* 44 a, Priesthood and sacrifice are correlatiues, and cannot be the one without the other. 1794 G. ADAMS. *Nat. & Exp. Philos.* III. xxvi. 102 Action and re-action are correlatives; one cannot exist without the other. 1842 J. H. NEWMAN *Par. Science* (1890) 292 The naturalist-traveller and his correlative, the museum curator and systematist.

b. Something corresponding or analogous; an analogue.

1875 WHITNEY *Life Lang.* iii. 39 We have its very ancient correlatives in Sanskrit *agra*, etc. 1879 SIR G. G. SCOTT *Lect. Archit.* I. 259 Those classes and purposes differ in a majority of cases, from their correlatives at the present day.

†**c.** Used of persons: A relative. *Obs. rare.*

1697 *Observ. Money & Coin* 33 As when a tender Parent or kind Friend orders..a Joynt or Limb to be cut off from his correlative.

3. *Gram.* Each of two correlative words: see A. 3.

1808 MIDDLETON *Grk. Article* (1855) 36 Correlatives are words in regimen, having a mutual reference. 1876 MASON *Eng. Gram.* (ed. 21) §288 b, *Either—or, neither—nor, whether —or, both—and*, are used in pairs as correlatives. *Ibid* §163 The proper correlative of *which* is *such*.

4. *Physics*, etc. A correlative force; the equivalent of some force in another form.

1855 H. SPENCER *Princ. Psychol.* (1872) I. II. ix. 278 Pains are the correlatives of actions injurious to the organism. 1862 —— *First Princ.* II. v. §56 What continues to exist during these oscillations is some correlative of the muscular effort which put the chandelier in motion. 1871 TYNDALL *Fragm. Sc.* (1879) I. xxi. 492 Every thought or feeling has its physical correlative.

5. *Biol.* A normally and apparently necessarily associated characteristic: cf. CORRELATION 3.

co'rrelatively, *adv.* [f. prec. + -LY².] In a correlative way, in or by correlation.

a 1656 HALES *Rem. Serm. John* xviii. 36 (R.) Our Saviour is a king three manner of wayes, and so correlatively hath three distinct several kingdoms. 1852 *Jrnl. R. Agric. Soc.* XIII. i. 210 The connecting of these observations correlatively together.

In sense it is identical with COSS *v.*, being the usual English form while *coss* is mostly Sc.; this, with the fact that both *coss* and *corse* certainly go back to an early date, makes it almost impossible to consider them as mere phonetic variants arising from the vocalization of *r* in *corse*, or the insertion of *r* into the spelling of *coss*. It is, however, in favour of their identity that there is a third verb, SCORSE, variously written *skoase*, *skoce*, *scoarse*, *scource*, synonymous in meaning with *corse* and *coss*; and that It. has both *cozzonare* and *scozzonare* 'to coarce or trucke horses with a horse-coarcer' (Florio).]

Hence ˌ**cortico'trop(h)in** [-IN¹] = ADRENO-CORTICOTROP(H)IN.

1942 *Jrnl. Endocrinology* III. 8 These experiments strongly suggest the presence of two different factors in pituitary corticotrophin—one affecting adrenal weight, the other the distribution of lipoid in the cortex. **1943** *Science* 3 Sept. 225/1 It is generally believed that hypophyseal corticotropin is protein in nature. **1944** *Lancet* 5 Feb. 188/2 Thus corticotrophin has been postulated as being responsible for all or part of the growth-promoting activity, glycotropic activity and diabetogenic activity of anterior pituitary extracts, and..there is evidence to support all these claims, though not evidence enough to make them by any means cast-iron. **1952** *Chem. cortier, obs. f. COURTIER.

‖ **cortile** (kor'tile). [It. *cortile* 'court or yard of a house' (Florio), deriv. of *corte* COURT.] (In Italy). An enclosed area or court-yard within or attached to a building: usually roofless or surrounded with a covered walk; occasionally roofed; sometimes serving as a hall or court of entrance, as in some Italian churches.

1841 *Penny Cycl.* XX. 75/2 The cortile of the Palazzo Piccolomini at Siena. **1875** H. JAMES *R. Hudson* xi. 403 Within, it [an Italian villa] had a great, cool, gray cortile, with high, light arches around it. **1884** HORNER *Florence* I. xxvi. 370 The central door under the portico opens on the cortile or court of entrance.

cortin ('kɔːtɪn). *Biochem.* [f. CORT(EX + -IN¹.] A crude extract of the adrenal cortex, containing several steroid hormones (see quots.).

1928 F. A. HARTMAN et al. in *Amer. Jrnl. Physiol.* LXXXVI. 359 The hormone of the adrenal cortex has been salted out with NaCl. *Cortin* is proposed as the name for this substance. **1943** *Thorpe's Dict. Appl. Chem.* VI. 277/1 Corticosterone possesses a high degree of cortin activity. **1948** R. D. H. HEARD in Pincus & Thimann *Hormones* I. xiii. 550 The term 'cortin' is used today in several senses, to denote (*a*) the active substances contained in whole adrenal extract, (*b*) any life maintenance factor of unestablished chemical nature (as in the amorphous factor), and (*c*) substances, again of unrecognized constitution, which possess any kind of cortical activity. **1949** S. & L. M. MIALL *New Dict. Chem.* (ed. 2) 152/2 *Cortin*, the hormone secreted by the suprarenal cortex... Several crystalline substances have been isolated from this extract, one of which, corticosterone, is believed to be the true hormone, which is still generally spoken of as cortin. **1961** *Brit. The Corved Herrings are never gipped but rowed in salt, for the better preservation of them, till they can be brought a shore, and if any be preserved for to make Red-herrings, they are washed out of the pickle before they be hanged up in the Red-herring houses. **1641** —— *True Narr. coset ('kəʊsɛt). *Math.* Also co-set. [f. CO- 4 + SET *sb.*[2]] A set composed of all the products obtained by multiplying, on the right or on the left, each element of a subgroup in turn by one particular element of the group containing the subgroup.

1910 G. A. MILLER in *Q. Jrnl. Math.* XLI. 382 If H represents any sub-group of the group G, all the operators of G may be represented..in either of the following two ways: $G = H + HS_2 + HS_3 + \ldots + HS_\gamma = H + T_2H + T_3H + \ldots + T_\gamma H$. If for each co-set HS_α ($\alpha = 2, 3, \ldots, \gamma$) it is possible to find some co-set $T_\beta H$ such that the totality of the operators HS_α coincide with that of $T_\beta H$, then H is an invariant sub-group of G. **1911** —— in *Trans. Amer. Math. Soc.* XII. 326 The sets HS_α, $S_\alpha H$ ($\alpha = 2, 3, \ldots, \rho$) have been called Nebengruppen or co-sets of G as regards H, the former being called the right co-sets and the latter the left co-sets. **1941** BIRKHOFF & MACLANE *Survey Mod. Algebra* vi. 146 We now come to a far-reaching concept of abstract group theory: the idea that any subgroup S of a group G decomposes G into cosets. **1973** W. LEDERMANN *Introd. Group Theory* ii. 33 The cosets Hx and Hy are identical if and only if $xy^{-1} \in H$. Any two cosets are either identical or else have no element in common. **1984** C. C. SIMS *Abstract Algebra* iii. 99 Let $f: G \to H$ be a homomorphism of groups. Then the kernel N of f is a normal subgroup of G, and two elements of G are mapped to the same element of H if and only if they are in the same coset of N.

c. *cosmic rays*, high-energy radiations with great penetrative power which are incident on the earth from all directions and which originate in outer space (*primary radiation*) or are produced in the upper atmosphere by the primary radiation (*secondary radiation*). So *cosmic radiation.*

1925 MILLIKAN in *Nature* 5 Dec. 824/2 Our experiments brought to light..a cosmic radiation of..extraordinary penetrating power... We obtained good evidence that these cosmic rays shoot through space in all directions. **1928** *Nature* Suppl. 7 Jan. 19/1 The cosmic radiation is defined as that small portion of the 'penetrating radiation' which is of cosmic origin. *Ibid.* 21/2 All this [*sc.* the experiments of Millikan and Cameron] constitutes pretty unambiguous evidence that the high altitude rays do not originate in our atmosphere, very certainly not in the lower nine-tenths of it, and justifies the designation 'cosmic rays'. **1945** H. cosmico- ('kɒzmɪkəʊ), comb. form of Gr. *κοσμικός* COSMICAL = cosmically, as in ***cosmico-natural*** adj.

1881 in *Nature* XXV. 193 Of the 'influences which act upon suicide', the first that are considered are the 'cosmico-natural'.

cosmism ('kɒzmɪz(ə)m). [f. COSM-OS + -ISM.]

1. The conception of the cosmos or 'order of nature' as a self-existent, self-acting whole; the theory which explains the cosmos or universe solely according to the methods of positive science.

1861 G. J. HOLYOAKE *Limits of Atheism* (1874) 7 To believe in Nature, in its self-existence, its self-subsistence, its self-action, its eternity, infinity, and materiality, and in that only, is Affirmative Atheism. *Note.* This might stand for a definition of Cosmism. *Ibid.* Pref., Cosmism, as well as Secularism, expresses a new form of Freethought. **1861** GRESLEY *Sophron & N.* 74 The new notion of Affirmative Atheism, or Cosmism. **1874** FISKE *Cosmic Philos.* I. 184 In the progress from Anthropomorphism to Cosmism the religious attitude remains unchanged from the beginning to the end.

2. (See quot.: formed after *patriotism.*)

1873 RUSKIN in *Contemp. Rev.* XXI. 928 The name of the emotion would then be properly 'Cosmism', and would signify the resolution of such a people to sacrifice its own special interests to those of Mankind.

cosmist ('kɒzmɪst). [f. as prec. + -IST.] A believer in cosmism; a Secularist.

1861 G. J. cost, obs. f. COAST, side, rib, border, region, etc.

cost (kɒst, -ɔ:-), *v.* Also 4–6 coste. Pa. t. and pple. cost; also in 4 pa. t. costed, costide, pa. pple. coste. [a. OF. *coster*, *couster* (mod. *coûter*) = Pr. and Sp. *costar*, Pg. *custar*, It. *costare*:—L. *constāre* to stand together, stand firm, abide, be settled or fixed, stand at a price, cost, f. *con-* together + *stāre* to stand.

The construction of this verb is idiomatic, and for its analysis it is necessary to go back to Latin. *Hoc constitit mihi tribus assibus* was literally 'this stood (to) me in three *asses*'. The dative of the person has in Eng. become an indirect object, *to* being never expressed; the Lat. locative (ablative or genitive) of the amount or price became a simple object in French, and remains an adverbial object in English, *in* being never expressed. Hence a natural tendency to view the noun expressing the price as a simple object, and the verb as transitive. That it is yet really intransitive is shown by the fact that it has no passive either with the price or the indirect object as subject; 'this cost me nothing' cannot be changed into 'nothing was cost me by this,' or 'I was cost nothing by this'. The adverbial adjunct may also be expressed by an adverb as *much*, *little*, *more*, *less*, *dear*(*ly* (cf. L. *carius constat*): even here the tendency is to look upon *much*, *little*, etc. as adjs. used substantively.]

1. a. To be acquired or acquirable at (so much), to come into one's possession or be maintained at (an expressed price); to be of the price of, be bought or maintained for, necessitate the expenditure of (an amount specified, or indicated as *much*, *little*, etc.).

costard ('kɒstəd). Also 5–6 costerd(e. [app. of English formation; not found in OF. Perhaps f. OF. and AF. *coste* rib + -ARD, meaning a prominently *ribbed* apple, a sense which agrees with the description of existing varieties so called.]

1. A kind of apple of large size.

Often mentioned from 14th to 17th c., after which the word passes out of common use, though still retained by fruit-growers in the name of one or more varieties of apple identical with or derived from the original Costard. The latter is described by R. Hogg, *British Pomology* 1853, as a large apple, distinctly five-sided, having five prominent ribs extending into the basin of the eye, and forming ridges round the crown. A Kentish grower who had *Martin's Costard*, described it in May 1892, as 'a very large apple, shape oval, very much ribbed, a strong grower, bearing every other year.'

cot (kɒt), *sb.*¹ Also 5–9 cott. [OE. *cot* neut. (pl. *cotu*), in Lindisf. Gosp. also ? *cott* (dat. *cotte*, *cottum*) = MDu. *cot* (infl. *cōte*), Du. *kot*, MLG. and mod.LG. *kot*; also ON. *kot* (infl. *koti*) neut.:—OTeut. type **kuto*^{m}. Beside this is found in same sense OE. *cote* (see COTE) = MDu. *cōte*, MLG. and mod.G. *kōte* (*kothe*) wk. fem., also sometimes in MLG. and Ger. dial. wk. masc. The form with *tt* found in Northumbrian is also in Rhenish dialects of G. from 14th c. *kotte*, but the gemination is not original, and merely marks the short vowel.

From the same root came OE. *cýte*, *céte*, prop. *ciete* cot, cell, chamber (whence app. ME. CHETE):—OTeut. **kautjôn-*, in which *kaut-* is in ablaut relation to *kut-*.]

1. A small house, a little cottage; now chiefly poetical, and connoting smallness and humbleness, rather than the meanness and rudeness expressed by *hut*.

In OE. used more widely for 'cottage, house, bed-chamber, den'. Sparingly represented in ME., in which *cote* and, later, *cottage* were more frequent terms. *Cote* in this sense having become obs., or merely dial., about 1625, *cot* has been revived as a poetical and literary term.

cottage ('kɒtɪdʒ). Forms: 4–6 cotage, 5– cottage. [app. a. AF. **cotage*, in latinized form *cotagium*, f. *cota* COTE[1], COT[1]. The force of the suffix was prob. to denote a cot and its appurtenances, a cottage tenement; but no distinct evidence of this is quoted. Mod.F. *cottage* is from Eng. OF. had *cotage* as a term of feudal law in the sense of base tenure (*tenure roturière*, Godef.), and the rent paid for a tenement so held. Cf. the following:

Ashmole MS. 837 (17th c.) art. viii. fol. 162 An Esquire.. is he that in times past was Costrell to a knight.. whereof euery knight had twoe at the least [in] attendance upon him, in respect of the fee, For they held their land of the knight by Cottage, as the knight held his of the king by knight service.]

1. A dwelling-house of small size and humble character, such as is occupied by farm-labourers, villagers, miners, etc.

Historically the term is found first applied to the dwelling-places or holdings which under the feudal system were occupied by the cottars, cottiers, cotsets, or coterells, and by the labourers of a farmstead; dwellings for the labouring classes in rural and urban districts were, under this name, the subject of various legal enactments, such as 31 *Eliz.* c. 7, 15 *Geo. III*, c. 32, etc., and, when under a certain rental, were exempted from paying church-rate, poor-rate, etc.; with the disappearance of legal regulations and exemptions, and under the influence of 4, the term has become more vague in its application.

4. a. 'The term cottage has for some time past been in vogue as a particular designation for small country residences and detached suburban houses, adapted to a moderate scale of living, yet with all due attention to comfort and refinement. While, in this sense of it, the name is divested of all associations with poverty, it is convenient, inasmuch as it frees from all pretension and parade and restraint' (*Penny Cycl.* Supp. (1845) I. 426). In this sense, the appellation *cottage orné* (*ornée*) was in vogue, when picturesqueness was aimed at.

cottar, cotter ('kɒtə(r)). [Partly ad. med.L. *cotārius*, f. *cota* cot; partly a later formation from COT *sb.*¹ + -AR³, -ER¹.]

1. Sometimes used to translate med.L. *cotārius*, applied in Domesday Book to a villein who occupied a cot or cottage with an attached piece of land (usually 5 acres) held by service of

labour (with or without payment in produce or money).

Cotarius probably represented the OE. *cotsæta* or *cotset*, *cotsetla*, and *cotman*, or at least, with the *bordarius*, included these. The distinction between the *cotarius* and the *bordarius*, *bordar*, or *bordman*, has not been satisfactorily determined; when both are mentioned together the *bordarii* are usually named before the *cotarii*, and the latter are much less numerous. In some cases, also, Domesday seems to distinguish *coscez* and *cotarii*: thus under the manor of Haseberie, Wiltshire, there are 'xiii coscez, and ii cotar'.' In Ellis's Abstract of Population in Domesday (II. 435-6), Devonshire has *bordarii* 4847.. *coscez* 70, *cotarii* 19.. *servi* 3294, *villani* 8070.

2. *spec.* In Ireland, a peasant renting and cultivating a small holding under a system hence called *cottier tenure.*

The main feature of this system was the letting of the land annually in small portions directly to labourers, the rent being fixed not by private agreement but by public competition; recent legal and political changes have rendered this practice obsolete.

1832 HT. MARTINEAU *Ireland* i. 6 An Irish cottier finds his business finished when he has dug and planted his potato field. **1842** S. C. HALL *Ireland* II. 120 Some landlords in Munster set their lands to cottiers far above their value. **1868** MILL *Eng. & Ireland*, He was a cottier, at a nominal rent, puffed up by competition to a height far above what could, even under the most favourable circumstances, be paid.

3. *transf.* A small farmer cultivating his parcel of land by his own labour.

1877 D. M. WALLACE *Russia* xxix. 460 These peasants proper, who may be roughly described as small farmers or cottiers, were distinguished from the free agricultural laborers in two respects: they were possessors of land in property or usufruct, and they were members of a rural Commune.

4. *attrib.* (chiefly in sense 2), as ***cottier farmer, rent, tenant, tenure***, etc.; **cottier tenancy**, the tenancy of the Irish cottier; by an Act of Parliament of 1860 defined as tenancy of a cottage and not more than half an acre of land, at a rent not exceeding £5 a year.

coullour, obs. f. COLOUR.

‖**couloir** (kulwar). [F. *couloir* colander, passage, lobby, the steep incline down which timber is precipitated on a mountain side:—late L. *cōlātōrium*, f. *cōlāre*, in F. *couler* to flow.]

A steep gorge or gully on a mountain side: first used in reference to the Alps (see quot. 1856).

1855 J. D. FORBES *Tour Mt. Blanc* ii. 21 It descended a narrow couloir from the Aiguilles Rouges. **1856** RUSKIN *Mod. Coulomb ('kuləʊm, -lɒm, ku:'lɒm). *Electr.* In sense 1 also **coulomb**. [After the French physicist, C. A. de Coulomb (1736–1806), who first invented the method of measuring the quantity of electricity.] 1. The designation adopted by the Paris Electric Congress in 1881, for the unit of electrical quantity; the quantity of electricity conveyed in one second by a current of one ampère. (For this unit the name *Weber* had been previously introduced into partial use.) Also known as ***international coulomb*** when defined in terms of the international ampere; in 1948 this was replaced by the ***absolute coulomb***, defined in terms of the absolute ampere and now incorporated in the International System of Units.

[In Branch I, repr. OF. *cuncile*, ONF. *concilie*, = L. *concilium* (f. *con-* together + *cal-* to call) a convocation, assembly, meeting, union, connexion, close conjunction; sometimes an assembly for consultation, in which sense it became confused with *consilium* an advisory body (though the confusion was perh. in most cases due to later scribes of MSS.). In mediæval times *concilium* was mainly appropriated to the assemblies convoked to settle points of doctrine and discipline in the Church, or the relations between Church and State in particular countries,—the *Councils*. An early L.-Gr. Gloss. in Du Cange has *Concilium*, *συνέδριον*, *συμβούλιον*, *σύνοδος*; and an ancient Codex of the Canons quoted by him has 'Synodum autem ex Græco interpretari Comitatum, vel Cœtum; Concilii autem nomen tractum ex more Romano'. In OF. *consilium* came down as a living word in the form *conseil*, while *concile* (*concire*) was used for the ecclesiastical *concilium*, which sense it still exclusively retains. In English, the two words were, from the beginning, completely confused: *conseil* was frequently spelt *conceil*; *concile* was spelt *consile* and *conceil*; and the two words were treated as one, under a variety of forms, of which *counseil*, later *counsel*, was the central type. In the 16th c. differentiation again began: *councel*, later *council*, was established for the ecclesiastical *concilium*, F. *concile*; and this spelling has been extended to all cases in which the word means a deliberative assembly or advisory body (where L. has *consilium*, Fr. *conseil*), leaving *counsel* to the action of counselling and kindred senses. The practical distinction thus established between *council* and *counsel* does not correspond to Latin or French usage.]

I. * Uses derived from L. *concilium*.

†**1.** *generally.* An assembly called together for any purpose; a convocation or congregation. *Obs.*

In the simple sense found only at an early date, and passing imperceptibly into the sense of 'deliberative assembly' (4).

2. *spec.* An assembly of ecclesiastics (with or without laymen) convened for the regulation of doctrine or discipline in the church, or, in earlier times, of settling points in dispute between the ecclesiastical and civil powers. [The only sense of F. *concile*.]

Variously qualified according to its sphere, as *œcumenical*, *general*, *national*, *patriarchal*, *primatial*, *provincial*, *diocesan* (this = synod). Without qualification, usually applied to ***general councils***, i.e. those called together by an invitation to the church at large, and claiming to speak in the name of the whole church, whether ultimately accepted as doing so (*œcumenical*) or not. In early times *general council* was used less definitely, e.g. for a national or provincial council. In the Middle Ages there were also ***mixed councils***, which met to settle both spiritual and civil affairs.

3. In the New Testament, regularly used to render Gr. *συνέδριον*, Vulg. *concilium*, chiefly in reference to the Jewish Sanhedrim, or a meeting of that body.

[In the MSS. and printed texts of the Vulgate, *concilium* and *consilium* are often confused; in Acts xxv. 12 the Clementine text has *concilio*, followed by the English versions, including 1611 and 1881, with *council*; but the oldest MSS. have *consilio*, the proper rendering of *συμβουλίου*. The Anglo-Saxon Gospels usually represent *concilium* by *ȝemót*, but they, as well as the versions of the Psalter, have sometimes *ȝeþeaht*, 'counsel, advice', implying that the translator had *consilium* before him in the Latin, e.g. in Mark xiv. 55 (where *consilium* is actually the reading of important MSS. written in Ireland and England). In Matt. xii. 14, *συμβούλιον ἔλαβον*, is rendered in the Vulgate *consilium faciebant*, for which Tindale, Cranmer, and version of 1611 have 'helde a counsell'; current editions of 1611 have 'held a council', 1881, correctly, 'took counsel'.]

b. *Great Council* (in *Eng. Hist.*): sometimes applied to a *Witena gemót* or assembly of the *witan*, under the Anglo-Saxon kings; more frequently to the assemblies under the Norman kings of tenants-in-chief and great ecclesiastics, out of which the House of Lords originated, and to occasional general assemblies of the barons or peers in later times. Also used of similar national assemblies of other countries, as the Cortes of Spain or Portugal.

The last *Great Council* in England was that summoned by Charles I at York in 1640, after the practice had been long disused. The name, though proper to the assembly, is sometimes given to its constituents as a permanent body: cf. sense 6. So *General* or *National Council*.

7. *Sc. Hist.* The Scottish Privy Council, the members of which, called *Lords of Council*, sat for judicial business during the vacation of Parliament; also the *Daily Council*, a body having civil jurisdiction, created by Act Jas. IV, 1503, c. 58.

In 1532, the functions of the latter body, together with those of the 'Session of James I' (Act 1425, c. 65), and the judicial functions of the Lords Auditors of Parliament (instituted 1368-9) were combined in the *College of Justice*, also called *Court of Session*, then created. To the ordinary judges of this court, called in the Act of 1532 *Lords of Session*, the King exercised (till 1723) the right to conjoin three or four 'vther Lordes' from the members of his Council. Hence the judges of the court are styled *Lords of Council and Session*, and its records the *Books of Council and Session*.

The word was common in AF. of all ages, in the sense of *earl*, but, unlike the feminine COUNTESS, never passed into English till used in 16th c. to represent the mod.Fr. *comte* and It. *conte*, as foreign titles. See also COUNTY *sb.*[2]]

1. A title of nobility in some European countries, corresponding to the English title EARL (by which in earlier times it was always translated).

It is now used to render not only the various cognate Romanic words, but also the German *graf* and its cognates in Du., Da., Sw., etc.

In reference to Roman History, it translates L. *comes*, as in ***Count of Britain*** (*Comes Britanniæ*) and ***Count of the Saxon Shore*** (*Comes Littoris Saxonici*), two of the generals of the Roman province of Britannia in the 4th century.

counter ('kaʊntə(r)), *sb.*[5] [ad. F. *contre*, It. *contro*, in same sense, a substantival use of the prep. *contre*, *contro* against.]

1. *Fencing.* A name applied to all circular parries, i.e. parries in which, while the hand retains the same position, the point is made to describe a circle, passing under the adverse blade so as to meet it again when the latter is 'disengaged', i.e. removed from engagement. Called also *counter-parry*, formerly †*counter-parade*, *counter-caveating parade*.

The particular engagement is indicated by an addition, as *counter-prime*, *-seconde*, *-tierce*, *-quarte* (*-carte*), *-quinte*, *-sixte*, *-septime*, *-octave* (now in practice reduced to four, *-seconde*, *-tierce*, *-quarte*, *-septime*).

[1611 FLORIO, *Contro*, as *Contra* in all compositions. Also a Counter.] 1684 R.H. *School Recreat.* 67 The Counter Caveating Parade, &c. When you observe your Adversary's Thrust coming home within your Sword, then immediately slope your Point, and bring it up again with a quick Motion on the other side of your Adversary's, and parrie his Thrust without your Sword, that he intended to give within your Sword. *Ibid.* 74 This may be Parry'd, by answering every Motion, or using the Counter-caveating Parade. 1707 [see CAVEAT *v.* 3]. 1809 ROLAND *Fencing* 64 To form a counter parade..at the time you disengage, I pass with a small circular motion under your wrist, or blade, and return, by forming my parade in nearly the same position I was in previously to your disengagement. 1889 W. H. POLLOCK, etc. *Fencing* (Badm. Libr.) ii. 57 Counters are named according to the engagement from which the parry is made. *Ibid.* 58 Reversed Counter-parries. These, as the name indicates, are the ordinary counter-parries executed the opposite way.

2. *Broadsword play.* An attack made as the adversary himself leads to attack. The stronger attack takes the advantage.

3. *Pugilism.* A blow delivered as the adversary leads off; really a time-hit, which, if stronger than the adverse one, secures the advantage.

A counter with the other hand is called a *cross-counter*; e.g. if the adversary leads off with his left, he may be cross-countered with the right.

'counter-, *prefix*:—ME. and AF. *countre-*, a. F. *contre-* (= Pr. It. *contra-*):—L. *contrā* adv. and prefix (see CONTRA-) against, in return. The form in which the Lat. prefix has come down through Fr. into Eng. Used in words actually adopted from earlier F., as *counterbalance, counterchange, counterfeit, countermand, countermarch, countermark, countermure, counterpoise, counterseal, countersign*, etc., and their derivatives; also in adaptations of later F. or Italian words in *contre-*, *contra-*; and in many words formed after them in English. *Counter* has thus become a living element of the language, capable of entering into new combinations even with words of Teutonic origin. It may be prefixed, when required, to almost any substantive expressing action, as *motion, counter-motion, current, counter-current*, or even to any word in which action or incidence is imputed, as *measure, counter-measure, poison, counter-poison*. Hence it is often viewed as an independent element, written separately, and practically treated as an adjective: see COUNTER *a*.

In those compounds which we have taken from French or Italian, the consolidation of the word is usually greater than in those formed in English, and they are regularly written as single words, as *counterbalance, counterfeit, countermand, countermarch*, though sometimes with the hyphen. The stress is normally, in verbs and their derivatives, on the root, in nouns and their derivatives, on the prefix: cf. to *under'go*, *'undertone*. But there are exceptions, esp. where the noun stress is taken by a verb of the same form, as in *to 'counterfeit*. In words formed in English the two elements are in looser union, both accentually and in writing. In verbs the rhetorical or antithetical stress on the prefix may be equal to, or even for the nonce stronger than, that normally on the root, as in *to plan and 'counter-'plan* (*'counter-,plan*), and the two parts are properly hyphened. In nouns, when the *counter-* word is contrasted explicitly or implicitly with the simple word (as in 3, 4, 5), the predominant stress of the prefix is strongly marked, as in *'counter-cheer*, *'counter-a,nnouncement*. These are properly written with the hyphen (now rarely as a single word, but occasionally in two separate words). When such a contrast is not distinctly present (as in 6, 9), the predominance of the prefix is less marked, and the root-element may receive an equal or greater stress; in such case there is a growing tendency to write the prefix as a separate qualifying word, and in fact to treat it as an adjective. Thus *counter-side, counter-truth*, become *counter side, counter truth*: see COUNTER *a*.

All permanent compounds in *counter-*, with some of the more important of the looser combinations, are given in their alphabetical order; of the casual combinations (many of them nonce-words) of obvious meaning, examples here follow.

I. 1. a. *verbs*, as COUNTERACT, COUNTER-MAKE, COUNTER-SAY, COUNTERWEIGH, COUNTER-WORK, with their derivatives: which see in their alphabetic places. Also many nonce-words, either contextual, or framed as literal equivalents of French or Italian verbs in *contre-*, *contra-*, expressing the doing of a thing or performance of an action in the opposite direction or sense, with a contrary effect, or in opposition, retort, or response to the action expressed by the simple verb; sometimes with the notion of rivalling or outdoing, checking or frustrating that action; sometimes merely in reciprocation. Such verbs were formerly more frequently formed and used than now. Examples: *counter-address, counter-advise, counter-affirm, counter-ambush, counter-avouch, counter-beat, counter-bid, counter-bore, counter-cross, counter-dance, counter-dig, counter-fix, counter-gird, counter-judge, counter-lock, counter-meet, counter-petition, counter-plan, counter-please, counter-post, counter-pray, counter-preach, counter-prick, counter-refer, counter-ruin, counter-shine, counter-state, counter-swear, counter-thwart, counter-traverse, counter-tug, counter-vote*. A rare sense in English is that of 'across, cross-', as in *counter-dash, counter-strike*; COUNTER-BAR, -HATCH. (These are hyphened, but were formerly often written entire. The main stress is on the verb.)

7. *Law*. Applied to a jury.

In 12-14th c. a jury was a body of witnesses summoned to decide by their sworn testimony (*veredictum*, verdict) some question debated between litigants who had formally agreed to be bound by that testimony. The jury being summoned from the neighbourhood (hundred) in which the controverted facts were supposed to have taken place, the question was said to be tried by the neighbourhood (L. *vicinetum, visnetum*, Fr. *visnet*) or by the 'country' (L. *patria*, F. *pays*). The litigants were said to put themselves *upon the*, or *their country*, and *trial by the country* was distinguished from other modes of trial. The phrase has been retained to the present day, when accused criminals still formally submit to trial 'by God and their country', although the character of trial by jury has been greatly changed. (F. W. Maitland.)

county[1] ('kaʊntɪ). Forms: 4–5 counte, cunte, 5 cownty, 6–7 countie, -ye, 6– county. [a. AF. *counté* (in Laws of Wm. I.), later *counte*(*e* = OF. *cunté*, *conté*, later *comté* = Pr. *comtat*, It. *comitato*:—L. *comitātus*, f. *comes*, *comit-em* COUNT: cf. *ducātus* DUCHY from *dux*, *ducem* DUKE. The L. word had primarily the sense of 'a body of companions, a companionship,' subsequently 'an escort or retinue'; when *comes* became a designation of a state officer, *comitātus* followed as the name of his office, and when the *conte* became a territorial lord, the *conté* became his territory—the stage at which the word entered English.]

† 1. The domain or territory of a count. *Obs.*

Common in AF., but in Eng. perh. only used in reference to the territory of a French or other foreign count. (The first quot. is fig., but seems to belong here.)

2. a. One of the territorial divisions of Great Britain and Ireland, formed as the result of a variety of historical events, and serving as the most important divisional unit in the country for administrative, judicial, and political purposes.

The AF. *counté* and the med.L. *comitatus* were used to render the English SHIRE, the division of the country administered originally by an *eorl* and later by a *sheriff* (AF. *viscounte*); whence *counte* was gradually adopted in English (app. scarcely before the 15th c.), as an alternative name for the *shire*, and in course of time was applied to the similar divisions made in Wales and in Ireland, as well as to the shires of Scotland, and also extended to those separate portions of the realm which never were shires, as the duchy of Cornwall, Orkney and Shetland, etc.

b. The status of county was also given at various times to a number of cities and towns in England and Ireland, with a certain portion of adjoining territory; these were separated from the shire in which they were situated, and made counties by themselves; more exactly called *corporate counties* or *counties corporate*: see CORPORATE *ppl. a.* 4.

c. By the Local Government Act of 1888 the word received a further modification of meaning; besides the historical counties, and counties corporate, boroughs of above 50,000 inhabitants were made administrative counties under the name of *county boroughs*, which were administratively, but not politically or judicially, independent of the counties in which they were situated.

d. In an organ; = COUPLER.

e. *Genetics.* (See quots.)

1906 W. BATESON et al. *3rd Rep. Evol. Comm. Roy. Soc.* 8 Complete coupling has so far been most commonly met with among characters of similar physiological nature. *Ibid.* 11 It is clear that gametic coupling, however caused, plays a large part in the phenomena of heredity. **1909** W. BATESON *Mendel's Princ. Hered.* ix. 151 The combinations of long pollen with blue factor, and round pollen with no blue factor occur seven times as often as the other two possible combinations. We speak of this phenomenon as Gametic Coupling. The term 'coupling' is strictly applicable, because the association is between two dominant or 'present' factors. **1926** *Encycl. Brit.* II. 162/2 It is sometimes convenient to distinguish the case in which the two dominants (*AB* × *ab*) are introduced together by the parent as coupling and the converse (*Ab* × *aB*) as repulsion. **1965** A. H. STURTEVANT *Hist. Genetics* vi. 40 The two dominants (purple and long) were contributed by the same parent, and the phenomenon was called 'coupling'. **1970** AMBROSE & EASTY *Cell Biol.* x. 338 Morgan showed that the proportion of crossing-over between a particular pair of alleles of two different genes .. was of the same order, irrespective of whether they were both initially on the same chromosome (in coupling) or on different chromosomes (in repulsion).

f. *Physics.* (i) A connection between two oscillating systems which results in a mutual dependence of their oscillations, so that an oscillation in one system causes an oscillation in the other and partly determines its character; *spec.* (and orig.) in *Electr.*, such a connection (physical or inductive) between two electric circuits. Also, the strength of this interdependence (so *tight, loose* etc. *coupling*).

1908 C. C. F. MONCKTON *Radio-Telegr.* vi. 101 Where oscillations in one circuit set up oscillations in an adjacent circuit the two circuits are said to be coupled. If a considerable portion of the field of force of the first circuit is embraced by the second the coupling is fast; if only a small portion, the coupling is loose. **1923** E. W. MARCHANT *Radio Telegr.* iii. 30 The looser the coupling between the two circuits, the less rapidly is the energy of the oscillating circuit used up and the more persistent is the oscillation of the aerial. **1927** I. (ii) In atomic, nuclear, and particle physics: a physical interaction between two particles, between a particle and a field, or between two fields; *spec.* an interaction between the magnetic moments of the electrons in an atom. Also used of the combination of mathematical quantities (in quantum mechanics) which corresponds to the physical interactions.

This was orig. a use of the word in the prec. sense; the electrons in an atom were thought of as capable of vibrating, and the 'coupling' of their vibrations was used (by Voigt, 1913) to explain the Zeeman effect.

coupon ('ku:pɒn, ‖ kupɔ̃). [a. F. *coupon*, in OF. *colpon, copon* piece cut off, cutting, whence the earlier Eng. CULPON, *colpon, coulpoun* slice, cut, piece (of meat, etc.). The latter has come down to *coupoun, cowpon, coopin* in Sc., but was obs. in English when *coupon* was reintroduced from mod. French.]

1. A separable certificate or ticket, of which a series are attached to, and form part of, certain original or principal certificates, in order that they may be severally detached and given up as required.

a. One of a set of certificates attached to a bond running for a term of years, to be detached and presented as successive payments of interest become due to the holder; a separable dividend-warrant. Also *transf.*, the nominal rate of interest redeemable at a given time on a bond, fixed-interest security, etc.; also *attrib.* **b.** One of a series of conjoined tickets issued together, which entitle the holder to certain services rendered in separate instalments, after each of which the corresponding coupon is detached and given up. They are largely issued by Excursion Agencies, so as to facilitate the prepayment in a singled fixed sum of the travelling and hotel expenses of a tourist, who then, instead of paying money, gives up the corresponding coupon at each stage of his tour. The name and system of Coupons was introduced by the late Mr. Thomas Cook in 1864.

[Early ME. *curt, court*, a. OF. *cort, curt*, later *court* (from 15th c. *cour*) = Pr. *cort*, Sp. and It. *corte*:—L. *cohort-em, cōrt-em* (nom. *cohors, cors*, in med.L. *cortis, curtis*) court, poultry-yard, yard, enclosure, also company of soldiers (COHORT), crowd of attendants, retinue. At an early date the French word appears to have been associated with L. *cūria* (which has not itself survived in Romanic), and hence apparently the series of senses under branches III and IV, in which *cūria* is the regular med.L. equivalent.]

I. An enclosed area, a yard.

1. a. A clear space enclosed by walls or surrounded by buildings; a yard, a court-yard; *e.g.* that surrounding a castle, or that left for the sake of light, etc. in the centre of a large building or mass of buildings; formerly also a farm-yard, poultry-yard. At Cambridge, the usual name for a college quadrangle.

c. A section or subdivision of the area of an exhibition building, a museum, or the like, open above (to the general roof), and usually devoted to the products of a particular country, or department of science, art, or industry.

This application of the word appears to have originated in the structure of the building in Hyde Park for the Great Exhibition of 1851. The rows of pillars supporting the roof, which crossed each other at right angles, divided the central area into a number of rectangular sections; these being themselves open to the lofty roof, while bordered on two sides by galleries supported by the pillars, suggested courts within buildings, and soon received the name; the term was further extended in the Crystal Palace at Sydenham (as in the Alhambra, Egyptian, Pompeian, and Renaissance Courts), and in later exhibitions has been used with still greater extension; it has also been, with more closeness to the original notion, applied to the central open area of a museum, surrounded by its arcades and galleries.

1851 *Illust. Lond. News* 3 May 364/1 The very nature of the construction of the building suggests its subdivision into courts; and this is distinctly illustrated in the plan of the gallery .. there are four of these large courts, and two smaller ones, parallel with the transept in each of these western divisions of the Building .. from the gallery these courts form a most interesting feature in the arrangements. *Ibid.* 31 May 494 The Tunis Court. *Ibid.* 495 The Canadian Court .. II. A princely residence, household, retinue.

5. The place where a sovereign (or other high dignitary) resides and holds state, attended by his retinue.

This sense is said to have arisen in Old French, the name *curt* being applied to the residences of the early Frankish kings on their rural domains: see Littré, and cf. sense 2. But the actual history is involved in obscurity from the paucity of early evidence.

III. An assembly held by the sovereign.

9. A formal assembly held by the sovereign at his residence: in early times, of his councillors and great lords, for purposes of administration; in later times to give state receptions, audience to ambassadors, and the like. The early use has given rise to the 'high court of parliament' (sense 10), and 'the king's courts' of justice (sense 11); the modern use is naturally associated with senses 6, 7, as in *to be presented at court*.

11. a. An assembly of judges or other persons legally appointed and acting as a tribunal to hear and determine any cause, civil, ecclesiastical, military, or naval.

Justice was in early times administered in assemblies held by the sovereign personally (sense 9), then by judges who followed the king as officers of his court; hence the title the *King's Courts* (*curia regis*).

In this sense more fully defined as *court of law, law-court, court of justice, of judicature.* These are distinguished as *superior* or *inferior*, according to their respective rank, the highest court of a country or state being called the *Supreme Court. court of first instance*: a court in which a matter must first be tried, as distinguished from a *court of appeal*, to which it may subsequently be carried. *court of record:* see quot. 1765.

'court-'baron. [a. AF. *court baron*, earlier *court de baroun*; in med.L. *curia baronis*, court of the baron or lord.] The assembly of the freehold tenants of a manor under the presidency of the lord or his steward.

Such a court had a jurisdiction in civil actions arising within the manor, especially in such as related to freehold land. This jurisdiction began to decay at an early date, and is now practically obsolete. (In modern times lawyers have distinguished between the *court-baron* which was the court of the freehold tenants, and the *customary court* which was the court for the copyhold tenants. The early history of this distinction is obscure. F. W. Maitland.)
